

# *Noise Measurement Program Results*

- Monitoring conducted from July 31, 2014 to August 13, 2014
- Long-term noise monitoring was conducted at 8 sites for over five days at each site
- DNL noise levels ranged from 59.1 to 64.9 DNL and were consistent with INM predictions
- Short-term noise monitoring was conducted at 33 additional sites for approximately one hour per site
