

Planned Redevelopment of Existing Airport Site

As part of the proposed replacement airport development process, the City of St. George plans to take advantage of the picturesque panoramic views of downtown St. George, the Redrocks, Pine Valley Mountain Range, Zion National Park, and the Beaver Dam Mountain Range that are afforded by the centrally-located plateau location of the existing airport site by re-zoning the land for a mix of uses, including:

- Residential
- Commercial
- Administrative and professional
- Light industry
