

Potential Range of Alternatives

Environmental Impact Statement

On-Site Alternatives

- Development Alternatives (realign, extend and/or shorten existing runways and/or taxiways; alternative terminal development)
- Operational Procedures
- Other Technologies (reduce separation between aircraft, Multi-lateration Based Precision Runway Monitoring, and Vertical and/or Short Take-off and Landing)
- Activity or Demand Management Alternatives

Off-Site Alternatives

- Use of other Airports (including other potential sites for a new or replacement airport)
- Other modes of Transportation and/or Telecommunications (including private automobiles, rail technology, mass transit, and video conferencing)

No-Action Alternative

- A requirement of National Environmental Policy Act
- Maintain existing runways, taxiways, and navigational aids. Serves as baseline for evaluating other alternatives
